

Facility Name	Do you have acute pediatric rehab program?	Is your pediatric rehab program within a pediatric or adult hospital?
A	Yes	pediatric hospital
B	Yes	pediatric hospital
C	Yes	pediatric hospital
D	Yes	Not freestanding; unit isn't just rehab services
E	Yes	Within adult rehab hospital

What is your inpatient capacity for pediatric rehabilitation (# beds)?	What is your Average Daily Census (ADC) for pediatric rehab program?	What is your Average Length of Stay (ALOS ) for pediatric rehab program?
2-5 usually/ 0-8 full range	(5 admits/month) 2.53	17.2
32	23	30
6	4-5	2-2.5 weeks
10	5	No response
10-12	8	20 days

What are the top 5 admitting dx or CMG groups admitted?	Do you currently use WeeFIM for pediatric rehab program	Do you have Pediatric Physiatrist
Brain Dysfunction Traumatic, Brain Dysfunction Non Traumatic, stroke, Pain, Non traumatic Spinal Cord	Yes	Yes
Pain, BI, Feeding, SCI, s/p surgery	Yes	Yes
SCI, CP post op, spina bifida, arthogryposis, OI post op	No, plan for 2017	Yes, Pediatrician with speciality in SCI rehab
No response	No response	Yes
brain injury, stroke, other neurological, SCI, orthopedic	Implementation pending	yes

What is the average caseload of the (Pediatric) Physiatrist	Staff Ratios: Nursing Day	Staff Ratios: Nursing Night	Staff Ratios: PT
*not contained to rehab, and serves inpatient medical service and additional consultative services throughout hospital.	1:3	1:3	1:4
Unsure	10 hours per patient day	10 hours per patient day	1:6
6-8 patients	1:3-5	1:3-5	1:3-5
2 MDs rotate coverage every 6 weeks (clinic vs. unit) and 2 MDs that cover weekends	No response	No response	No response
	1:6		1:6

Staff Ratios: OT	Staff Ratios: SLP	Staff Ratios: Psychology	Recreation Therapy
1:4	1:3	prn	0
1:6	1:6	?	1
1:2+	1:2+	1:2+	1.5
No response	1 for unit	No response	No response
1:6	1:5	2 psychologists share entire inpatient (70 pt); 2	1 for entire hospital

**Notes**

This is difficult to capture as they have the Acute Inpatient Rehab Program, an Inpatient Medical Service for kids who aren't appropriate for 3 hours, a Consultative service where they consult on patients throughout our 289 bed hospital, and an outpatient clinic. While our actual acute inpatient rehab program is fairly small, the consultative service can keep them extremely busy./ Also, ratios specific to rehab patients, not acute care where ratios are higher

Nursing 10 hours per pt day; staff rations based on productivity per hour

All of our therapists and nurses see a mix of rehab and acute post op. Our therapists additionally see an outpatient mix during the day. Our full time therapists each get 2 rehab patients on their caseload (kids are typically seen twice a day) and then we fill in the rest of the day with acute post ops and outpatients. I don't know if our information is useful to you since we don't have therapists dedicated to just inpatient rehab
