

Outpatient Facility	Do you Cover Saturdays? Yes or No	All day or morning only?	Type of patients seen?	How many therapists and how do you rotate?	What is patient attendance?
ORG A	No				
ORG B	No, it would also be an employee dissatisfier				
ORG C	No, not at this time.				
ORG D	Yes, We have also offered Saturday hours in order to recapture visits due to unexpected events (ex. weather related, power outages)	On make up days, hours may be 8am- 2pm	Any patient is welcomed to reschedule during any available time on Saturday	One staff member per discipline is usually sufficient.	? Cancellation rate is about 5-10% which is significantly lower as compared to the week.
ORG E	No to first Yes to second with limitations	Half day	Concussion Clinic only in fall and spring during heavy sports seasons	2 PT's and a NP	
ORG F	Yes, But we are again looking at expanding services to include offerings on Saturdays.		We currently offer limited sports/ortho PT on Saturday mornings. We have tried offering Sat services in the past for children with developmental disabilities and have had poor show rates.		

ORG G	No outpatient clinics are open (we surveyed families and there were not many takers)				
ORG H	No				
ORG I	No, At ORG I, On rare occasions we may have a recent discharged wound patient that requires treatment on a Saturday. The time is prearranged with the family so they do show for their appt. The therapist who works that Saturday shift will have received treatment instructions from the weekday therapist.				
ORG J	No, At this time, we aren't providing coverage on Saturdays. There has been some discussion, but as yet, we aren't doing it				
ORG K	Yes	8 am to 2 pm	Any	We have 3 OT, 3, PT and 3 ST; this is part of their regular weekly schedule	90%+, we have a higher standard for Saturdays
ORG L	No, but curious of results				
ORG M	Yes	9:30-5:30	Any	Just one therapist who chooses to work on Saturday	Similar to the week
ORG N	Yes	All Day	not specific, only based on the staff who work on Saturday	We do not rotate. Saturday is part of their normal schedule so they would have another day off as part of the normal	generally the same as during the week. Staff are required to meet

				schedule. Number and type of therapists differ based on desire mostly. Currently mostly SLP and OT staff...about 4 staff total	productivity overall so Saturday is just another day in the mix.
ORG O	No, I have heard this was tried in the past and was not successful due to families not being able to commit to Saturday appointments with other weekend activities (nor did the staff love it/it was covered on a rotating basis), but that was before I was in my role so can't speak to it directly. I'll be interested to hear what responses you get from others!				
ORG P	No				
ORG Q	Yes -	All day 8am-430pm		Some of the physical therapists work every Saturday, and some work every other Saturday. We also have afternoon times until 700 Mon – Thu, and until 530 on Fridays. Saturdays are very busy all day for the physical therapists during the school year, and is our slowest day during the summer, so	

				we adjust our staffing accordingly.	
ORG R	No – We did years ago but had poor attendance. Also concerned about staff satisfaction currently.
