

Location	In the outpatient setting, how much time is allocated for occupational therapy sensory evaluations?	Does this differ from the amount of time allocated for other occupational therapy evaluations?
ORG A	2 hours	We offer the same amount of time for all evals because we don't always know for the referral what will be needed.
ORG B	90 minutes	All of our OT evaluations are set for 90 minutes.
ORG C	1 hour Our typical evaluation block is 2 hours for OT evaluations. Occasionally, these will be put into 1 hour blocks at the therapists' discretion, but this is not the norm.	Length does not differ because it is a sensory referral. Write up time is separate for all our evals.
ORG D		All of my OT evaluations are 2 hours with exception of helmet evaluations, OT only feeding (sensory/picky eaters), OT hand evals, which are all 1 hour.
ORG E	60 minutes	No all OT evaluations are 60 minutes except for intensive evals
