

Mutlidisciplinary Clinic Charging

Organization	Codes Used	Modifier Usage	Documentation of Modifier	Alternative Approaches / Additional Information
ORG A	PT - 97750, 97161 OT - 97750, 97165 ST - 92507, 92526	No	NA	
ORG B	Does not charge	NA	NA	If the physicians want/need Rehab in their “clinics” they are paying for the therapist’s salary dollars...and we are not billing. We do obtain physician orders from a licensure perspective, however, and then make a short note of HEP and/or screening findings.
ORG C	Does not charge	No	NA	“High Risk Developmental Assessment Program” for post NICU babies – includes 1 therapist and a medical provider. Therapist completes the Bayley Screening (30-45 min) every 3-6 months and then they are seen by the medical provider. They are NOT writing an evaluation of any type and the therapists do not bill. They are given internal “productivity” for their time, and the physician bills a visit. We determined that we would not bill evaluations, as often these kids require other therapy services and these brief clinic visits would not give us adequate information to make a full plan of care. If the child is deemed to need services, they are referred for a full evaluation by the physician.

Mutlidisciplinary Clinic Charging

				Therapists document the assessment in EPIC and it is attached to the physician note.
ORG D	Not currently providing care in specialty physician clinics			
ORG E	Evals Treatment on occasion under the MD's POC (hand clinic)	no	NA	In order to bill for eval all components of an eval must be completed. For those providing treatment under the plan of care of a physician this is stated in our note, these are really for the patients we are not recommending to come for hand therapy. If we recommend the patient to come for therapy then we should be establishing a plan of care and thus complete an evaluation. There is also a handful of clinics or times, where the therapist is really just educating and check in and those they just don't bill- we are trying to monitor these clinics---if they aren't going to bill this cannot happen all the time or it is not productive and we would need to look at the physician buying out the therapist's time.
ORG F		no	NA	Growing support in multidisciplinary clinics
ORG G				Provide support in multidisciplinary clinics
ORG H	Non billing code used for consult; Eval code used if element met	no	NA	Does not charge when does not meet all elements of eval; The therapist enters a consult note to document the conversation.
